## Profile

Full Stack Developer

Enthusiastic full-stack web developer, with a strong focus on PHP (Laravel) and JavaScript (Vue.js). With extensive experience working on various libraries and frameworks, I pride myself on delivering high-quality, efficient, and scalable solutions. My greatest achievements include the successful development of numerous projects, while continuously enhancing my skillset and staying updated with the latest industry trends.

## Employment History

### Full Stack Developer, AppRoq, Vilnius, Lithuania

November 2022 – Present

- Contributed to the development of a real estate platform alongside colleagues, focusing on payment processing, transfers, and document management.
- Integrated modern treasury and Plaid for seamless money transfers through third-party APIs.
- Utilized Vue.js for designing frontend and Laravel for backend development, ensuring an efficient and user-friendly experience.
- Worked on a unique event management project, incorporating unconventional logic to set it apart from traditional solutions.
- Continuously focused on improving code quality and adhering to best practices for seamless collaboration with the team.
- Utilized Agile methodologies to adapt to changing project requirements, enhance collaboration, and deliver high-quality software solutions in a timely manner.

### Lead Full Stack Developer, Sidora AG, Winterthur, Switzerland

May 2019 – February 2023

- Developed a Content Management System for the company, which manages over 30 online projects and has over 10 customized modules such as E-Commerce. It receives over 100k visits per day.
- I have built the company's internal system for project management, including task management using the Scrum methodology, and daily tracking of employee vacations and company expenses.
- I have developed over 10 customized software development projects, using the latest methods and constantly adapting to new advancements in the field.
- Responsibility for recruiting other co-workers, training them, and teaching them the best practices of development.
- Build innovative, state-of-the-art applications and collaborate with the User Experience (UX) team.

Leadership and Teamwork

Custom Laravel-based CMS

Agile and Scrum

Critical thinking and problem solving

Collaboration & Teamwork

Debugging and troubleshooting

## Languages

English

Albanian

- I have used the following technologies: PHP (Laravel), Javascript (Vue JS), Livewire, HTML, CSS (SCSS), Tailwind/Bootstrap, MySQL, Redis, RequireJS, jQuery, Websockets etc.
- Maintain quality and ensure responsiveness of applications.
- Execute software development for outlined work; support, maintain and document software functionality, design and architecture.

### Backend Developer, SPINP Agency, Pristina, Kosovo

August 2018 – May 2019

Develop, record and maintain cutting edge web-based PHP applications. Build innovative, state-of-the-art applications and collaborate with the User Experience (UX) team.

- Worked with product managers to re-architect a multi-page web app into a single page web-app, coached more than 15 distributed software system projects.
- Constructed the logic for a streamlined ad-serving platform that scaled to our 20K users, which improved the page speed by 15% after implementation.
- Tested, coded, reviewed, and delivered software with 100% on-time record and according to service level objectives.
- Responsible for maintaining various websites and providing training to customers on how to use the system.

## Education

### Bachelor, UBT - University for Business and Technology, Prishtinë

October 2016 – October 2019

During my time at UBT (University for Business and Technology), located in Pristina, Kosovo, I received a robust education in Computer Science and Engineering. The combined program ensured a strong foundation in computer science and engineering principles, preparing me for careers in various fields such as software development, data science, and systems analysis. The curriculum, focused on practical experience and applied skills, allowed me to participate in internships, research projects, and collaborations with industry, ensuring a well-rounded education and solid preparation for my future career.

## Additional Information

### Professional Reference - Sidora AG, Winterthur, Switzerland

I have received a glowing professional reference from my most recent employer, who has recognized my dedication, technical skills, and contributions to their company. The reference highlights my work in web development, specifically focusing on PHP, Laravel, and JavaScript, as well as my ability to work well within a team and my strong communication skills. ### Doktorim - Healthcare Platform, Pristina, Kosovo

June 2022

Doktorim is a SaaS product that allows patients in the Balkan to find and book appointments with their preferred doctors. It provides information about doctors' experiences, education, and ratings, and has an algorithm that ranks doctors in various ways, including those located closest to the user. The app is targeted at the healthcare sector. As the creator of the platform.

- As the creator of the platform, I have been invited to discuss it on numerous national radio and television programs, highlighting the platform's recognition and success.

- Doktorim has also garnered attention from a significant number of online portals, further emphasizing its relevance and impact in the healthcare industry.
- The platform connects patients with healthcare professionals, streamlining appointment scheduling and improving the overall patient experience.
- Doktorim offers various features such as online consultations, prescription management, and access to medical records, making it a comprehensive and user-friendly solution.
- The platform's success demonstrates my ability to identify industry needs and develop innovative, scalable, and effective solutions.

Technologies Used: PHP (Laravel), Livewire for backend, Bootstrap and jQuery for frontend.

- 

### **Open-Source Contributions**

- Active contributor to the open-source community, developing and maintaining various popular packages on GitHub.
- Some of my most notable packages include [livewire-wizard](#), [laravel-model-json](#), [livewire-tabs](#) and [laravel-js-settings](#), showcasing my expertise in creating widely-used and valuable tools for fellow developers.
- My open-source contributions have inspired others to create [video tutorials](#) and write articles, helping users better understand and utilize my tools, and demonstrating the impact of my work on the developer community.
- My open-source contributions have received positive feedback from users, and my tutorials have helped countless developers to improve their skills and implement my packages in their projects.
- Along with my open-source contributions, I have also been active on Stack Overflow, providing helpful answers and support to fellow developers, further demonstrating my expertise and dedication to helping others.
- Through these contributions, I have demonstrated my passion for programming, commitment to community engagement, and ability to create valuable resources for fellow developers.
